Cooking Surface 72" W x 20" D // Overall 80" W x 23" D x 36" H // 245 lbs.

Verrill Farm - Concord, MA

Solid Construction

The perfect balance between durability and weight. The single piece chassis are manufactured from strong tubular steel (just like our country club gas grills) making them easy to load, tie down, and transport in a truck or van. Our ¼" thick steel griddle plates are securely bolted to the chassis increasing the strength and durability of the design.

Menu Versatility

Transition easily from breakfast to lunch to dinner. Griddles are the most versatile of all cooking appliances and one of our best selling equipment lines. If you want to give yourself the option to serve pancakes, fajitas, cheese steaks, stir-fried veggies, and even burgers all on the same piece of equipment, then our griddle is your best option.

Controllable Heat Zones

You have 2 choices - heat the griddle surface evenly to cook on the entire surface or graduated for cooking in the front and holding in the back. The large warming area under the stainless steel burners can hold full size food pans adding even more versatility.

Our Most Versatile Cooking Appliance

We have used Big John's grills & griddles for over 20 years. They are the work horses of our operation. We have had units from other manufacturers but they could not withstand the constant abuse & demands of a high volume cater. They're perfect for cooking for 50 guests or 5,000.

Folding Leg Carts are Manufactured from 11 Gauge Powder-Coated Carbon Steel

"We love all of our Big John equipment from the utility stoves to the grills to the griddles. Our events would not be complete without them. They are consistent, easy to use, very durable & perform well under all conditions. They are well constructed & hold up to all the tests that we have put them through."
