A4P Package with Hood
Hood Open and Closed

- SUPERIOR PERFORMANCE:** A-Series Grill firebox and burner delivery system is designed for the fast, high heat cooking requirements of commercial food service operations. Independently controlled heat zones (*see Advantages of Gas on page 4*) and lava rock maximize barbecue flavor. The firebox is also designed to reduce flare-ups by routing excess grease through the stainless steel burner insert pans into separate stainless steel drip trays.
- DURABLE:** A-Series Portable Grills are sturdy, reliable and safe. They are built around a double-wall stainless steel firebox (*see inset on page 2*) that provides a sanitary, easy cleaning corrosion resistant body designed to last a lifetime. They feature a strong tubular steel frame to protect the grill body from damage. For improved safety and reliability we use wind-resistant, low-pressure burners and recess the control valves into the firebox for protection against possible damage.
- OUR QUALITY GENERATES LOYALTY:** Three out of four purchases are made by customers who already own Big John equipment.

Specifications	A4P	A3P	A2P

Portable Gas Grills

The Choice of Grilling Professionals

A3P Package
Includes Cast Iron Grates, A3FC, Leg Brace and 30 lb. Tank
Shown with optional Drip Tray Locks

- **STACK AND TRANSPORT IN LIMITED SPACES:** The compact design of these Grills and Folding Leg Carts allow these units to be stacked on top of one another for storage or transportation.
- **SOLID CONSTRUCTION:** Our stands are manufactured from 11 gauge carbon steel for strength and powder coated for a UV resistant, long lasting finish. They also feature dual locking mechanisms for safety.
- **OPTIONAL LEG BRACE** is strongly recommended. It is easily installed to provide extra strength and support for the folding legs while they are extended open.
- **SOLID REPUTATION:** If you are looking for the ultimate in quality, durability and versatility - our grills are the proven solution.
