

# Trail Boss Tow Behind Gas Grills

Our Best Performance – Our Best Quality

Trail Boss 1 Single Door Gas Grill  
Includes Dual 30 lb. Tanks, Warming Rack and Front Storage Box

- **SUPERIOR PERFORMANCE:** Pull up to your next party with a Trail Boss and start cooking with the best tow behind gas grill on the market. They are built around our proven A-Series stainless steel grills (see pages 2 through 7) that have four separate firebox sections, lava rock and eight independent burners per grill for precise heat control. Lava rock provides the instant, intense and searing heat needed for great barbecue flavor.
- **BUILT TOUGH:** Trail Boss Grills use our proven A4P stainless steel gas grills (see pages 6 & 7). Stainless steel cooking hood with built-in thermometer, warming rack and dual 30 lb. tanks are standard. Our 12 gauge steel chassis has heavy-duty leaf springs and 4.8" x 12" tires for a smooth comfortable ride, even over rough roads.
- **HEAT CONTROL:** Professional Chefs love these grills because each grill grate can be independently controlled. Two burners per section generate up to 40,000 Btu and isolate the heat for total control of each grill grate.
- **DURABLE:** Trail Boss Grills are reliable, durable and safe. They are built around a double-walled stainless steel firebox that provides a sanitary, easy cleaning, corrosion-resistant body. For improved safety and reliability we use wind resistant, low-pressure burners and recess the control valves into the firebox for protection against possible damage.
- **HIGH CAPACITY:** Designed and built specifically for large cooking events, festivals and BBQ competitions. These popular units are purchased by rental stores, off-premise caterers, hotels, resorts, universities and military clubs.

Models	Grilling Area	Burners & Controls	Overall Dimensions	Weight
Trail Boss 1	7.3 sq. ft.	8 x 20,000 Btu	45" x 116" x 46"	830 lbs.
