THE STRONGEST, MOST RELIABLE CHARCOAL GRILLS ON THE MARKET

Best Grill Tops

Our easy to clean one-piece grill tops feature a welded steel core for strength and nickel plating for durability. Our simple slide action adjustment has 2 grilling heights to accommodate a wide variety of cooking needs.

Durable 1000° F Powder Coat Finish

Our specially formulated powder coat withstands the extreme heat of burning charcoal. It forms a chemical bond with the steel making it resistant to heat, scratches, corrosion, UV light, and fading.

Balance Between Strength & Weight

Our charcoal grills are designed to go wherever you go. They are the perfect balance between strength, durability, and weight. Manufactured to be rugged enough to last a lifetime yet weigh under 150 lbs.

American Quality

Big John Grills are manufactured, assembled, and packaged in the U.S.A. We take pride in our products and don't cut corners. All of the extra steps we take to ensure quality make our grills better. Don't be fooled by a knock-off. Be sure to know where your next grill is made.

Georgetown University Grilling Society - Georgetown, MD

The ease of use combined with the opportunity to serve 300+ burgers every Friday are some things we love about Big John. The smell of charcoal burning and beef cooking matched with the sounds of laughter and classic rock are what make Every Friday so special for us here at Georgetown. We would not be able to continue this 16 year tradition of serving delicious burgers every week if it were not for Big John Grills. We love our Big John grills. We look forward to ordering many more grills in the future.

Screw-In Legs // No Casters
Cooking Surface 3' W x 2' D
Overall 47" W x 24" D x 31"- 34" H
93 lbs.

Strongest Legs & Casters

Our M-13B & M-15B feature strong threaded steel pipe legs. The 5" solid rubber swivel casters are 1 1/4" wide for maneuvering over uneven terrain and can support up to 6 times the weight of the grill. For convenience, our model M-13FB & M-15FB feature folding legs for easy setup.

Not Too Big & Not too Small, It's Just Right

Our Little John is made just as tough as its big brother from the adjustable grate down to its wheels. The only thing it's missing is the 2 feet in the middle. The Little John proves you don't have to be the biggest to be the best.

Stainless Steel Components

Our rotisseries are designed without compromise. We use Type 304 stainless steel to manufacture the spit, skewers, support bar, and support bar clamps. These components are durable, easy to clean, sanitary, and will not rust. Roast confidently knowing our hardware holds a whole animal or large roasts securely in place.

Reliable Motor

Our rotisseries utilize a reliable chain drive system that safely places the spits' entire weight onto the two supporting mounts. Other manufacturers use a direct-drive system that can put a damaging load on their motor and gearbox bearings. Our 1/20 hp electric motor turns at 7 rpm – the perfect speed for self-basting. Nobody knows rotisseries like Big John, it's in our name.

Original Rotisseries - Perfect for Open-Pit Slow Roasting

American BBQ Co - Denville, NJ

We have been using Big John Grills and Rotisseries for nearly 25 years. They have never let us down!
