

Stainless Steel Elite Gas Grills

The Ultimate in Quality and Durability

A4CC-SSE
shown with Optional FA-4 Stainless Steel Hood

- **BUILT TO LAST A LIFETIME:** Stainless Steel Elite (SSE) Grills are built entirely from high quality type 304 stainless steel providing a lifetime of trouble-free cooking.
- **SUPERIOR PERFORMANCE:** The A-Series firebox and burner delivery system is designed for the fast, high heat cooking requirements of commercial food service operations. These grills feature fast start-up, independently controlled heat zones (*see Advantages of Gas, page 4*) and lava rock for maximum barbecue flavor. The A-Series firebox is also designed to reduce flare-ups by routing excess grease through stainless steel burner insert pans, into separate stainless steel drip trays.
- **OUR QUALITY GENERATES LOYALTY:** Three out of four purchases are made by customers who already own Big John equipment.
